

Risk Management Education Program

Explainer video - Transcript

We don't want any solicitor to have to deal with a claim against them, and we know you don't want to go through that either. That's why we've put together the Risk Management Education Program. It's practical, it's easy to access, and it's built on real-life cases and claims, so it's relevant to the challenges you face every day. We use the latest claims data, keep an eye on new risk trends, and tap into expert advice, so you're always ahead of the curve.

Our events are delivered both face-to-face and online, to best fit in with your practice.

If you want to dig deeper, check out our resource library. It's organised by area of law and risk, and packed with articles, guides, podcasts, videos, publications, and handy checklists. All designed to help you stay on top of risks in your practice.

The best part? Most of our events and resources are low-cost or even free, and they count towards your CPD points. Taking part can also earn you some pretty decent discounts on future insurance premiums.

We've seen firsthand that our Risk Management Education Program helps reduce claims. But it's not just about avoiding trouble; it's about building value, sharing knowledge, and supporting good practice as the legal world keeps changing.

If you're keen to learn more, view our full program of events and resources and register online. And if you've got questions or need help with bookings, our Practice Support Services Team is just a call away.
